

## Review Netflix

### Netflix, Inc.

Find the series and movies that everyone talks about with the best quality on Netflix! This service is revolutionizing the way we watch our favorite shows, series or movies at a very affordable price that is worth considering

It is history to have to go to the nearest place to rent a movie. Netflix allows access to a catalog of audiovisual content without having to move, and thanks to its mobile application, its content can be consumed from anywhere.

**Netflix** is ??a **streaming service** that allows you to watch a wide variety of **series, documentaries, and movies** on any device with internet access, such as cell phones, computers, tablets, or smart TVs, **with the payment of a fixed monthly fee**.

To start using it, you must open a Netflix account. With the registration, the user has a free trial month, although it is necessary to link the credit card number to the account. They will only charge the subscription amount to the card if the page has not been entered before the month to cancel it.

Membership is a month-to-month subscription with no contracts or cancellation fees, offering the possibility to unsubscribe from the service at any time online. The minimum is a month that starts counting from the moment the account is activated.

**The Netflix price** at its most basic rate is € 7.99 / month and you will not have any type of permanence commitment.

As it is a streaming platform, to **contract Netflix** it is necessary to have **Internet** at home.

With the same username and password you can use the service on up to 5 devices simultaneously: a computer, a cell phone, a tablet or a television, so that you can share the account with your whole family and will not imply additional costs.

When **Downloading Netflix** once inside the interface we can see that we have an immense catalog of movies and series just a click away, the truth is that it loads very fast and that makes it very interesting. Every time we stop in front of a movie with the mouse it tells us what it is about, the title and also gives us the rating of other Netflix users, which is good to know a little what other netflix users think of the movie.

If we slide down, it shows us different categories, popular, new releases, comedies, TV shows and series, documentaries, crazy comedies, it is an immense catalog. A tip, once we are using it and we enter several times we will see that it always teaches us the same, so many times it is convenient to search from the magnifying glass that is the search what you are interested in seeing because there is much more than what seems .

It is interesting to note that the releases are not immediate, they are not the most recent titles, but they are of high quality. We can say that the movies may be approximately two years old. The loading of the films is very fast and gives us a choice if we want to see with different audios or subtitles.

The Netflix catalog is not the same in all countries so to see other catalogs from other countries because there are movies that appear in that version and not in yours, it will be necessary to download a parallel program so that the platform allows you to change the country . We can customize our tastes on Netflix so that each time you access the application the catalog that appears to you is more in line with you.

We recommend that you install an extension for your chrome browser called netflix trailer button in the play store, what it does is add a little button under each of the movies that if we click on it we can see the trailer for the movie, it is truly appreciate that there is such an extension, it really is very useful.

If you are watching a series without having to do anything, go to the next chapter at the end of the one you are watching or if you leave a movie in half when you want to resume it, you can start watching exactly from the same second where you left off. All these things make **Netflix Download** very interesting, although we all know that it is not the only service, there are many others that are paid as well as free but with low download reliability.

I hope that with this you have learned a little more about what is new for series and movies. Enjoy the benefits of this magnificent tool now!

Pros	Cons
<ul style="list-style-type: none"><li>- Simple and easy to use</li><li>- No ads</li><li>- Original program</li><li>- You can download the content and watch it offline</li><li>- Different membership plans</li><li>- It is affordable</li><li>- Fantastic experience</li></ul>	<ul style="list-style-type: none"><li>- New content is not immediately available</li><li>- Outdated library</li><li>- Each region has a different content offering.</li><li>- Many series have only a few seasons and are not complete.</li></ul>
