

Review Asphalt 9: Legends

Gameloft

Asphalt 9: Legends is the best mobile racing proposal. The game produced by the renowned company Gameloft recreates great scenarios on its tracks. It has a graphic quality similar to that of the best consoles and the possibility of playing with cars of recognized brands

One of the genres with the most followers in the world of video games is racing. The adrenaline rush of a game between the vehicles of the best and most luxurious brands is one of the things that most attract car fans. The renowned French video game development company Gameloft brings us, in a unique and high-quality proposal, **Asphalt 9: Legends**.

Free Download Asphalt 9: Legends will introduce the user to a world full of incredible tracks set in different countries and cities around the world (Rio de Janeiro, New York, Brooklyn, among others). The graphics presented by the Gameloft app are among the best that can be found on the market and repeat the quality and definition of its predecessor Asphalt 8: Airborne from 2013. The experience it offers on mobile phones is as if we were playing on a video game console. Latest generation with three-dimensional finishes, with all the careful details and HDR (High Dynamic Range) effects.

Although players can get this **free app**, it is possible to make in-game purchases. One of the advantages of this proposal is that your store offers constant discounts and we can get the best cars at very affordable prices.

And is that vehicles are the main stars in Asphalt 9: Legends. The designs of the best and most recognized brands are present in this game and we will have the chance to race races with cars from the Ferrari, Porsche, Lamborghini and W Motors teams. In addition, once we have access to one of them, we have the option to customize them to our own liking. Not only can you change the color in general, but also users can choose between official aspects, custom colors, bodywork, modify wheels, spoilers, trunks and brake calipers. Each car has different attributes of top speed, acceleration, handling and nitro. There are 50 cars available.

The gameplay is another of the great advantages that **Asphalt 9: Legends** has. It is a very fun arcade-type alternative in which the riskiest drivers will be able to perform dangerous and fun flips in the air using the ramps that appear on the tracks, the turbo of our vehicle or the possibility of making 360-degree turns by pressing the brake button twice.

The Gameloft product offers many hours of entertainment for those who want to play alone or compete against other players. Asphalt 9: Legends has more than 60 seasons and 800 races and allows games to be run against drivers from all over the world. It is possible to compete against seven other players. If you want to participate with friends, the platform offers the chance to create online pilot clubs. This offers the chance to collaborate in teams to obtain a greater amount of prizes when climbing the table of the best teams in multiplayer mode.

TouchhDrive is another great news around the popular mobile racing title. With this modality you will have the opportunity to drive your vehicle like no other. It is the best mobile control system. Simple, agile and intuitive. The company offers here one of the main options that surpasses its competitors since the subject of controls is one of the most difficult to please players.

So that the experience of this great offer of the **games and applications** market is complete and users do not get tired of it, Gameloft regularly offers all kinds of events. There are both for individual and team challenges. Being

aware of them will allow you to get great rewards

Among the **Asphalt 9: Legends game modes**, one of the most fun and featured is Pursuit Mode. Here we must escape from police cars that are chasing us. In this alternative you can greatly appreciate the graphics of the maps and the possibilities that our vehicles have.

Asphalt 9: Legends is without a doubt one of the best options for fans of the racing genre. Provide a product with the level to be on the best consoles. If you have a good mobile or tablet, you will get juice from the Gameloft proposal.

Pros	Cons
<ul style="list-style-type: none">- Good graphics for a mobile game.- Pursuit mode is very fun and original.- Great discounts in your store to get cars.- High-end real brand vehicles.	<ul style="list-style-type: none">- Lack of customization options in the cars.- The best graphics performance is blocked for the vast majority of mobiles.- It is difficult to get hold of some vehicles.- The maps are the same as their previous version.
