

## Review Hearthstone

### Blizzard Entertainment, Inc.

Hearthstone is a new Blizzard Entertainment hit. The heroes and figures of the Warcraft saga are transformed into collectible card characters in this game. We will delve into different types of confrontations to achieve the largest and most effective collection that will take us to the glory of this popular free download app

Blizzard Entertainment is synonymous with quality in the world of electronic entertainment. We all know very well his succession string from Warcraft, Diablo, Starcraft, Overwatch and World of Warcraft to name a few examples. From the hand of the company founded in 1991 comes one of the best **free apps** available in Android and iOS virtual stores. We mean **Hearthstone**, the online trading card delivery.

**Downloading Hearthstone** will offer us one of the best mobile experiences available today. The game is about collecting special card decks to fight battles against artificial intelligence, in campaign mode or against other users in the multiplayer option.

One of the **advantages of Hearthstone** is that being a **free downloadable** game all users have the same chances of winning the games. Purchases can be made to obtain a greater variety of cards, but spending a lot of money and having a deck full of different heroes, spells and attacks does not guarantee victory if the figures are not combined in the best way. The strategy will be the guide to achieve higher level and victories. You have to spend a good amount of hours on this great Blizzard title to combine different cards and find which ones work best between them.

The protagonists of this fantastic adventure are nothing more and nothing less than the renowned characters of the Warcraft saga, in what is another great success of the company in charge of this title. Each hero has his particular story, characteristic, powers and group of cards. The game strategies will change depending on which one is used. The varieties are: Demon Hunter, Druid, Hunter, Mage, Paladin, Priest, Rogue, Shaman, Warlock and Warrior. To get each batch you have to defeat them individually in practice mode. In addition, the game has constant updates that keep it full of new content to ensure different challenges, challenges and novel battles. There will be no equal games in what is one of the best alternatives of today's **games and applications**.

**Hearthstone's game modes** are various, we will have options both between users and against artificial intelligence. Also achieving triumphs will give us rewards that will enable us to improve our decks with more and better cards. In Battlegrounds we will face 7 other opponents with the last one standing standing the winner. The Standard alternative brings us a PvP showdown where we will arm our deck with the cards from our collection to play against another person in a casual or competitive mode. In Wild the battle against another person will be without any type of restriction, that is to say that any card can touch us. In the Arena mode we will find a tournament type option in which you enter with a special ticket and play with decks of one card at a time. Tavern Brawls allows you to enjoy the modality against other players, against artificial intelligence or cooperatively; here the objective is to fulfill the random rule that the game proposes since they are objectives that vary week after week. Finally, in Fireside Gatherings we can also play against others, against the AI ??or in a cooperative and they will be played on public stages.

Regarding the graphics and interface of Hearthstone we find a very nice aesthetic that has high quality drawings. The movements are dynamic and the board is friendly to spend hours playing the best battles with our decks. The sound is also noteworthy since the cards have interesting interactions and responses with voices of the characters.

The account you set up to play Hearthstone will be with the Blizzard site which enables you to carry out the experience on any device you want. We are facing another success of the company that ensures hours of entertainment and dedication to achieve glory.

The card game does not privilege those who spend money to buy card expansions but those who play best. Whoever studies his rivals and his own troops the most will have the greatest achievements. Performing different tests and combinations is great practice to be the best at Hearthstone.

Pros	Cons
<ul style="list-style-type: none"> <li>- Known characters.</li> <li>- Variety of letters.</li> <li>- Constantly updated content.</li> <li>- Good interface and graphics.</li> </ul>	<ul style="list-style-type: none"> <li>- Little soundtrack, can be repetitive.</li> <li>- In-game purchases.</li> <li>- You have to dedicate hours of practice and training.</li> <li>- Updates can cause problems on the server.</li> </ul>
