The application developed by Super Tapx Limited, Love Balls, offers us a fun challenge in which we will have to join two balls by drawing as few lines as possible. With a very simple mechanics, this nice game allows us to develop our ingenuity by overcoming increasingly difficult levels

If we review the lists of applications from both Google Play and the App Store, we will find ourselves in the first positions with **Love Balls**, the game that we are talking about today, and that despite its simplicity has hooked hundreds of thousands of users of all the world. It has even become the object of worship of many YouTubers who have made different videos about the game.

Once again, simplicity is the exponent of this game, which will hook us to unsuspected limits. In addition, the game mechanics are very simple, since we only have to try to get the two balls that are the main protagonists of the game to their destination.

To do this we must draw paths in the air so that both balls come together. Once this happens we will have passed the level. If you do not get it the first time, do not worry as we will have several attempts, and even if you do not manage in any way to make the two balls come together, you can resort to the help button that will offer us a suggestion so that we can collect the balls.

The game, as it happens with many others, offers us in-app purchases, although originally it can be downloaded completely free of charge. Purchases allow you to get "help" within the game itself, although after trying it for a few days we can tell you that they are not necessary at all.

If you want to have a nice time and play a game without too many complications, **Love Balls is definitely your game**. Of course, be careful not to get too hooked since collecting balls is totally addictive.

You must click on the initial object that represents the notebooks of the schools where the students like to drown when they get bored in class. With a little help from the game's tutorials, you'll get a feel for the balls. They are colored in pink and blue, which can represent that they are attracted to each other, but do not forget the rules of gravity. While trying to draw the perfect surface for free-rolling balls, try to use as little ink as possible. This will increase the number of stars for your performance.

After starting to practice it this way, you can easily see how your star rank will change. In the **game**, the obliques between these two balls will be different on each level. You will face many challenges and sometimes you will have to draw an imaginative object that will fall on some of the balls and they will meet. Along with the basic levels of this game, you can also try some interesting shots to make the balls a bit more cool and stylish. So be sure to play around with these options. In the background store you can choose from a variety of themes, so before buying one you will have to pass some levels in which you can normally earn 75 coins.

Everything you want to change from the pen you use to the **ball** masks costs a number of coins, say 500 coins for pirate costumes. You can buy different pens, pencils, fineliner, etc. You can always see your results history and try to improve it, but you can also share your scores with social networks to impress your friends.

As we said before, when you go ahead, things will get a bit more complicated and you will have to draw some lines instead of one. Or the object you will draw on the balls will fall on them, but it will continue to be real objects in the game. So just use your logical thinking and of course, try different strategies.

Sometimes, as people, we must fail just for the good to learn how to better prepare ourselves next time. So don't be surprised when things in the game simply change their nature. You can even try the customization aspect of the wreme game, you can draw your own levels. You can try to stimulate your brain or simply reduce boredom when you have some free time.
