

## Review Minecraft

### Mojang

If you like strategy games, you have to try, if you have not already done so, Minecraft, where you are cunning and intelligence, will be essential for you to emerge victorious from this game. It will give a space for your imagination and construction skills to be shown to this great computing world

The developers of the **Minecraft game** have made it cross-platform, and to some extent has helped promote it. Since launching several years ago, Minecraft has become one of the most popular games and has a legion of followers, including some of the world's most famous YouTubers. the world that many others enjoy this excellent game. The game was developed by Swedish Markus Persson and by the end of 2019 active players had just over 112 million.

It doesn't matter what kind of game you like because you will fall in love with Minecraft from the first day. And is that the ability to explore randomly generated worlds or the ability to build things as big as you want and as incredible as your mind can imagine is something that everyone likes. This game will reveal the engineer and encourage you to jump even your own limits. In this very peaceful and rational way, there is no violence in the game. You don't have to kill anyone, take the artist inside you faster, because in the context of your game you choose the era in which you will build. You will choose the materials you want to work with. To recreate the true and authentic image of your dreams. See the world from the most interesting angles in this three-dimensional pixelated world, change textures, and build the world you would like to live in.

And we are not saying it, and it is that everything you can imagine can be built in Minecraft. If you don't believe it, you just have to dive into YouTube for a while to see the great properties that sometimes look like real cities, soccer stadiums, museums, or, as we say, everything you can imagine.

In addition, the various game modes such as Survival that it offers will serve to guarantee that each type of player can fully enjoy this game, which is available on a large number of platforms and, of course, has its own mobile version, which we can download from Google Play and the App Store. Of course, we warn you that the gaming experience is not the same that you will find on a computer, but even with everything that will serve you for fun.

If you are looking for a fun and addictive game, in addition to building everything that runs through your imagination like a crazy person and giving it away with a lot of emotions, **Download Minecraft** right away and start enjoying.

As we all know Minecraft is a game released 10 years ago, it is one of the only existing games that after so many years is constantly being updated and continues to bring new features that make this a unique game.

We also talk about the game with the most sales in history and after the great impact it has had to believe that someone does not know it, but as we know "Minecraft" some time ago died with the fame of the battle royale category games, among these the most Standouts are PUBG, Fortnite or Garena Free Fire although the game never really died, it continued to have millions of monthly subscribers but there was a loss of them but for a couple of months and in this year 2020 there are more and more new subscribers who have joined the community like many old players returned to the game.

Thanks to the YouTubers who kept uploading videos of the **Minecraft** game and the updates they became very striking, which caught people's attention causing a lot of desire to play. In fact, there is a YouTuber who literally uploads Minecraft videos where he walks in a straight line to find the farlands. If you do not know what the farlands

are like, a book that was formed in the game after an immense number of blocks was named, thus creating strange block positions where some even have no collision and that part of the game becomes unplayable.

Being a game compatible with so many platforms and having a good crossplay with the bedrock version, it made it easier for players to live together. Minecraft was a game before, although it was quite limited compared to now it was the best of the time, having unique mechanics, and it has always been very efficient in the optimization issue, since now for less than 100 Mb you can do and create many things without almost no limitation or restriction.

Ready to start enjoying how much Minecraft has to offer?

Pros	Cons
<ul style="list-style-type: none"><li>- A very simple game that has become one of the most popular worldwide</li><li>- The fun is endless no matter how long you have been playing for years and years</li><li>- Work with your creativity and imagination</li><li>- Wide community</li></ul>	<ul style="list-style-type: none"><li>- Sometimes it can become a bit monotonous, especially if building and building is not our thing</li><li>- It is not the same to play Minecraft on a mobile device as a computer, but it is also highly addictive</li><li>- Updates are not are so frequent</li><li>- Graphics are not his strong suit</li></ul>
