

Review NBA 2K20

Visual Concepts

NBA 2K20 is the new installment of the franchise, the basketball simulator continuation offers a number of updates like never seen before. Become a player in the best basketball league in the world with its Face Scan feature and get the champion ring

NBA 2K20 is a video game developed by Visual Concepts and published by 2K Sports in which you can become the best player in the most important basketball league in the world. It is a simulator based on its successor, NBA 2K19, and is the 21st installment in the NBA 2K franchise.

NBA 2K20 will always be up-to-date, from the app itself you can consult its daily calendar and see first-hand what its next events will be. Its mobile application comes to complement its video games on other platforms, you find it available for PS4, Xbox One and PC. With it, feel part of the NBA universe by scanning your face and becoming one of its players, getting virtual coins or completing a collectible of cards with which to compete against other users.

In this card battle mode, the objective is to collect all the stars of the league, current and classic, and to challenge the rest of the players around the world, it has different modes, such as Quick Matches, Player vs. Player, Best Triplist and the **Champions**, who returns to **NBA 2K20**. If you win at weekly events like Track King or Challenge, you will get the best cards and you can become the best. You'll also find new events every day and weekly, earning you additional rewards, like uncovering the secret draft pattern.

To start playing **NBA 2K20** is as easy as installing it on your device and linking it to your video game with the console account you have. To be able to scan your face, you just have to click on Face Scan and start to get your 3D version, from the application itself they will mark the steps to follow with its built-in camera. Once scanned at all angles, click upload image and you already have it available on your console in the **My Player** Aspect section. You can repeat it as many times as you want and customize it to your liking.

2K always meets our expectations by offering the most ways to practice the sport of the basket that you love the most. This year adds small but delightful updates, new animations bring individual players to life, and changes to the mechanics have improved the game in ways that are very interesting for players, for the classics and new additions.

For example, the new **NBA 2K20** mechanic allows you to change foot movements, something that will likely require veterans to practice a lot to get an idea of how things have changed. Re-learn when the time is right and discover the best to improve your technique. Animations are the key to success, the NBA maintains the recent franchise tradition of having a top-notch performance.

In addition to depleting the standard of living, the players look the same as in their real life and have the official clothing, but they also do not look as good as in **NBA 2K20**, the game does everything possible to ensure that they feel as if were real.

All of the usual modes are back, but it's generally the Career mode that tends to grow bigger and 2K aims to take things further than ever with some of the biggest star powers we've seen so far. Thomas Middleditch, Mark Cuban, Rosario Dawson all appear there alongside many NBA stars such as LeBron James and Anthony Davis and they are all excellent additions to the Campaign mode, centered on the story titled When the Lights are Brightest.

This expanded mode feels more cinematic than ever thanks to these celebrity additions and a new focus on less trivial decision-based segments and more basic gameplay.

NBA 2K20 updates everything it can, with the new sequel to the series comes better control, improved graphics and NBA players. A good idea is the opportunity to create your own rosters, move players to other teams, or simply create your own star team. You can create a draft game to import into franchise mode, they even have historical ones you can use. The Creation mode is fantastic and is one of the most complex and detailed of other current ones.

Finally, in customization, you even have the ability to create your own shoes, select from a variety of different brands, and simply add layer after layer until you get your favorite style.

What is the verdict? **NBA 2K20** is a great basketball simulator with lots of game modes, customization options and interesting story in Career mode. It feels like real basketball and that's really the most important thing to emphasize, since a sports simulation is as good as anything else.

Pros	Cons
- Many fans. - Good updates and improvements. - Improved career mode. - You can customize your own player with your face	- Not many really new features. - More difficult to control. - The game sometimes fails and cannot enter. - Promotional codes fail.
