

Review Rebel Racing

Hutch Games

Rebel Racing is one of the applications with more adrenaline than you can get for your mobile phone. Hutch Games' proposal brings very real races with a great simulation of driving in cars of the largest recognized brands in the world. It is free to download

Rebel Racing is a racing game for Android and iOS that can be **downloaded for free**. When the game is just beginning, it invites you to go to the store and choose items from category D. Your registration for the festival includes the price of your first car. There are great options, so you can choose your favorite among which you have Ford, Nissan or Mazda.

The first thing you should do is run the first race is to buy fuel. It begins with a beach scene in the city by the sea, to skid around the curve we must keep the left button pressed. The first race is very short and you can use nitro to go faster for a few moments. Once you win you see the total and continuous wins.

When you win your first race then you go to the second and the game gives you the option to improve your car, start with nitro, power, maneuverability and traction, you must have money raised to be able to improve your car or make the free improvements that it gives you .

Climb positions to get better and better prizes in one of the best **free games** on the market. The higher you climb, the better the rewards.

In the second race you must complete the objectives to climb positions. Earn more as the difficulty of the challenge increases. It is also short the race and as a critic it would be nice if I had the map where you can see in what position your opponents are in order to know if they are very far or very close for example.

When you get to the third race, it tells you it's time for your first heads-up challenge in the league. You must defeat the category bosses in head to head battles to win the rebel racing festival. The goal of the race is to defeat Madison, who has been winning science awards since he was third. Your car carries a fuel with its own formula. Show them what you know! An appreciation is that the races are short enough to be enjoyed 100%.

You can claim either the mystery gifts or the daily gifts by clicking on the gift pictures on the screen before starting the fourth race. You can earn gold, body color, wheels, stickers, among others.

You can also make improvements to the air intake, tires, exhaust, nitro, gearbox, engine depending on the money you have available.

In the daily reward you can earn things such as energy to be able to better pass the race.

Once a day try a mystery car for a chance to earn extra money to run your races.

The game is practically an auto-runner and you can control the movements from left to right, so clean driving is essential. In this way, it will help you do it like a professional, even if you are still a beginner, just act professionally.

Be sure to follow the directions in front of your car, try to avoid accidents, and drive on the road, not outside. Sooner or later you will be rewarded for these skills. You need to improve your mechanics as soon as you can, things like Assisted Nitro are very important to a good race.

Another thing here is competing with other people in the game, giving you a chance to grab their best cars. You will

have many opportunities to win something better. After each race, see the stats and earning some rewards includes things like special keys, microchips, and other advanced features.

The biggest challenge is competing for a car. Say yes and go, you have nothing to lose. In this way, you can take a custom build car that is exactly what you want. In this case, you may need to upgrade your car to some super nitros, for example (it can cost you around \$ 2). So once again, this purchase may not guarantee that you will win, but your career will. But if you do this, when you hit the road you will say you will be amazed.

If you follow this strategy you will soon see how this works for you. If your cars win, your rank level will increase, you will be able to buy better cars in the store. Don't forget that the cars in this game are just amazing and will have more of them.

Last but not least, in races with more people where accidents are more common, just restart if you feel like losing from the start and don't worry, this won't count.

Obtaining **Rebel Racing** will be one of the best options of **free games to download on mobile** that you can choose.

Pros	Cons
-Good graphics	- Short races
-Excellent simulation	- It can be monotonous
-Auto from renowned brands	- You have to make payments to play more games
- Very real scenarios	- Controlling some cars can be complex
